

Comfort Controls

INFRATECH™
a SEACHROME company

Multi-Zone
Analog Controls

New Single and Two Zone
Analog Remote Controls

Infratech remote control systems allow the major portion of the control system to be mounted in a remote location near the power panel or equipment room. The remote panels house the solid state relays and fuse protection for the control systems.

The remote controller can be mounted in a simple switch box (supplied with unit.) The cover plate for the remote controller is 300-series brushed stainless steel and can be connected to the main control panel with 22 ga. control wire.

State-of-the-art Digital Solid
State Controls. Many options
available; including multiple
zones, timers, and non-contact
infrared thermocouples.

Simple, Cost Effective
Input Regulators

New Plug-In
Input Regulators

INFRATUBE™ Comfort Heat Controls
